PROFILE SUMMARY

Results-driven Web Developer and Systems Builder with 2 years of experience helping businesses improve operations, generate opportunities, and scale through technology. Experienced in developing websites, web applications, mobile applications, and automation solutions that simplify processes, enhance user experience, and support business growth. Skilled at translating business requirements into practical digital solutions that deliver measurable results while keeping systems simple, efficient, and easy to use.

WORK EXPERIENCE

- Full Stack Web Developer & Mobile Developer, Poseidon Distribution OPC (May 2026 – Present)**
Develop and maintain web and mobile applications that support daily business operations, improve customer experience, and streamline internal processes. Collaborate with different departments to create practical digital solutions that reduce manual work, increase efficiency, and help the company scale its services. Focus on building user-friendly systems that address real business needs, improve productivity, and contribute to revenue growth.
 - Web Design & Automation Support (Project-Based)**
Built business websites and automated repetitive processes to improve operational efficiency, reduce manual tasks, and support client growth through better online presence and streamlined workflows.
 - Web Developer & Systems Builder, Systemizedleadz OS**
Developed lead generation systems, customer management solutions, and business automation workflows that helped improve marketing performance, increase lead conversion opportunities, and simplify day-to-day operations for clients.
